IMPLEMENTING RECOVERY FOCUSED EVIDENCE BASED PRACTICE FOR ADULT SURVIVORS OF SEXUAL VIOLENCE

Patty Yauger, LCSW; Adult Team Supervisor
Carlos E. Golfetto, M.S.Ed., NCC
Objectives

- Participants will become familiar with PAAR’s use of multiple Evidence Based Practice approaches in trauma therapy.
- Participants will be able to identify steps for implementation and integration of Cognitive Processing Therapy within their agency to complement existing therapy practices.
- Participants will be exposed to an overview of and three key components of Cognitive Processing Therapy treatment.
Ice Breaker

• Change 3 things about yourself

• Group discussion on changes
PAAR’s History

• 1972 - Pittsburgh National Organization of Women establishes PAAR in response to a series of rapes.

• 1974 - Incorporates as a 501-c-3 organization providing sexual assault hotline services, medical/legal advocacy and victim services.

• 1979 - Counseling services offered to child victims and their families.

• 1991 - PAAR moves from its small Oakland office into a large historic structure that was a Baptist Church.

• 1980 – PAAR challenged the legal system and fought for the privacy rights of all rape victims.

• 2011 – PAAR’s Executive Director, Alison Hall receives national recognition for her leadership role in helping to establish the first Sex Offender Court in PA
PAAR’s Mission

Respond, Educate & Advocate

TO END SEXUAL VIOLENCE
PAAR’s Services

- Adult Counseling- individual counseling services to male and female clients ages 18yrs old and up who have experienced sexual assault or abuse.

- Child/Family Counseling- individual and family counseling provided to child and adolescent victims of child sexual abuse or assault. Mobile therapy is provided in residential treatment facilities, group homes and foster homes.

- Prevention and Outreach services- prevention programs are provided throughout Allegheny County to elementary, middle and high schools, colleges and community groups.
PAAR’s Services

CRISIS INTERVENTION SERVICES

• Hotline: Volunteers and advocates trained to support, comfort and inform victims, 24 hours a day.

1-866-END-RAPE

• Medical Advocacy: Advocates meet victims and their families at area emergency rooms to support victims throughout forensic medical exam.

• Legal Advocacy: Advocates provide support to victims as they navigate the judicial system with court accompaniment in Criminal and Juvenile Court.
Activity

- Implementing new approaches
Integrative approach to counseling survivors of sexual violence

- Cognitive Processing Therapy (CPT) is our primary modality
- Eye Movement Desensitization and Reprocessing (EMDR)
- Supportive Psychotherapy
- Art Therapy
- Psycho-educational groups
Cognitive Processing Therapy

What is CPT?

• Based on social cognitive theory of Post-traumatic Stress Disorder (PTSD)
• Trauma focused approach
• Short-term evidence-based treatment for PTSD
• A specific protocol that is a form of cognitive behavioral treatment
• Recovery focused
Cognitive Processing Therapy

What is CPT?

• Based on social cognitive theory of Post-traumatic Stress Disorder (PTSD)

• Trauma focused approach

• Short-term evidence-based treatment for PTSD

• A specific protocol that is a form of cognitive behavioral treatment

• Recovery focused
Cognitive Processing Therapy

- **CPT treatment:**
  - Format – Individual
  - 12-16 sessions
  - Structured – Practice assignments: Trauma focused impact statement, trauma narrative, and worksheets
  - Measurable – PCL (PTSD Check List), BDI (Becks Depression Inventory)

Beck's Depression Inventory

This depression inventory can be self-scored. The scoring scale is at the end of the questionnaire.

1. I do not feel sad.
   0. I feel sad.
   1. I am sad all the time and I can’t snap out of it.
   2. I am so sad and unhappy that I can’t stand it.

2. I am not particularly discouraged about the future.
   0. I feel discouraged about the future.
   1. I feel I have nothing to look forward to.
   2. I feel the future is hopeless and that things cannot improve.

3. I do not feel like a failure.
   0. I feel I have failed more than the average person.
   1. As I look back on my life, all I can see is a lot of failures.
   2. I feel I am a complete failure as a person.

4. I get as much satisfaction out of things as I used to.
   0. I don’t enjoy things the way I used to.
   1. I don’t get real satisfaction out of anything anymore.
   2. I am dissatisfied or bored with everything.

5. I don’t feel particularly guilty.
   0. I feel guilty a good part of the time.
   1. I feel quite guilty most of the time.
   2. I feel guilty all of the time.

6. I don’t feel I am being punished.
   0. I feel I may be punished.
   1. I expect to be punished.
   2. I feel I am being punished.

7. I don’t feel disappointed in myself.
   0. I am disappointed in myself.
   1. I am disgusted with myself.
   2. I hate myself.

8. I don’t feel I am any worse than anybody else.
   0. I am critical of myself for my weaknesses or mistakes.
   1. I blame myself all the time for my faults.
   2. I blame myself for everything that happens.

9. I don’t have any thoughts of killing myself.
   0. I have thoughts of killing myself, but I would not carry them out.
   1. I would like to kill myself.
   2. I would kill myself if I had the chance.

10. I don’t cry any more than usual.
    0. I cry more now than I used to.
    1. I cry all the time now.
    2. I used to be able to cry, but now I can’t cry even though I want to.

Cognitive Processing Therapy

CPT treatment goals:

• To educate the client about symptoms of PTSD and depression

• To decrease PTSD symptoms or related trauma symptoms such as depression and anxiety disorders.

• To teach survivors of sexual abuse how to be their own therapist when future problem arise
Eye Movement Desensitization and Reprocessing (EMDR)

EMDR is an evidence-based psychotherapy used to treat Post Traumatic Stress Disorder and trauma. EMDR can alleviate symptoms stemming from past traumas. EMDR uses the following mechanisms:

- Bi-lateral eye movements or tapping
- Uses an adaptive information processing model which consists of 8 phases. (History Taking, Preparation, Assessment, Desensitization, Installation, Body scan, Closure, Reassessment)
- Can be integrated with CPT by developing coping skills and other resources such as a Calm Place.
Supportive psychotherapy is used to treat depression, PTSD, and anxiety by improving self-esteem, psychological functioning, and adaptive skills. Therapy focuses upon:

- Current issues
- Problematic relationships
- Maladaptive patterns of behavior and emotional responses
Art Therapy

• Art therapy helps clients to increase insight, cope with stressors, work through traumatic experiences and increase cognitive abilities by using the creative process of expressing themselves through art.

• Art therapy can be integrated with CPT by having a client use artwork to express themselves, process their trauma and the impact the trauma has on their life.
Getting Started Groups are used to teach coping skills prior to starting counseling. We present the client with an overview of:

• PTSD symptoms and a cognitive explanation of the development and maintenance of PTSD
• Managing Triggers and Flashbacks
• Addressing feelings of Anger and Rage after Abuse
• Trauma Tool box
M is a 51yr old female client.
Family history: neglect, emotional and physical abuse, drug and alcohol abuse.
Sexual abuse history:
• age 3 yrs old on up - inappropriate sexual boundaries by mother
• ages 7-9yrs old - sexually abused by neighbor’s grandfather.
• age 21yrs old - acquaintance rape.

6/27/2014
PCL-S & BDI Assessment for client M

- **PCL-S** is self-report PTSD Checklist. A score of 45 or above may qualify for a diagnosis of PTSD. A drop in score of 10 pts or more is clinically significant.

- **Becks Depression Inventory Score** is self report assessment on depression.
Client’s Artwork: Before therapy
Client’s Artwork: After therapy
Average BDI Score for All Adult Clients
October 2012 - February 2014

1-10: These ups and downs are considered normal.
11-16: Mild mood disturbance.
17-20: Borderline clinical depression.
21-30: Moderate depression.
31-40: Severe depression
Over 40: Extreme depression

Becks Depression Inventory Score is self-report assessment on depression

Average drop in BDI score was 14 points
Average PCL-S Score for All Adult Clients
October 2012 - February 2014

Average drop in PCL-S score was 28 points
Supervision & Consultation

- Cognitive Processing Therapy - attended a two day training to learn CPT.

- EMDR - Trained in EMDR part 1 & 2.

- Supervision - Group and Individual supervision are held weekly at PAAR.
